PROPOSALS

For Publishing, by Subscription,

THE COMPLETE WORKS OF

SIR WALTER SCOTT:

With a Biography: being the first American (and only) edition which contains the Author's last additions and illustrations, arranged upon their respective pages.

A COMPLETE and uniform edition of the various productions of the great 'Minstrel of the North,' is a *desideratum* with the American public. No library is complete without them, and no edition extant is sufficiently compact for such a repository; while the endless number of editions, *without any uniformity in size,* heretofore published, besides being exceedingly cumbrous, are far too voluminous and expensive to be within the reach of the great majority of readers. The undersigned therefore announce, that they have now in press, and will issue, an edition of the Works of Sir Walter Scott, which will embrace all his Poems, Novels, Histories, Biographies, and Fugitive Compositions, as well as the Biography and Private Correspondence, now in the course of publication in England, under the superintendence of Mr. Lockhart.

1st. In Parts: each Part embracing as much matter as is contained in two volumes of the present editions of the Waverley Novels, which will be put at the unprecedented low price of THIRTY SEVEN AND A HALF CENTS.

2d. Two parts will appear each month; but should the publishers find the work to meet the patronage they anticipate, FOUR PARTS will be issued monthly.

3d. The whole will be completed in *seven volumes, or forty eight parts.*

The paper on which the above is now printing, has been made expressly for the purpose; the present parts may, therefore, be considered a fair specimen, in every respect, of the whole work; but, should dissatisfaction arise with any subscriber, owing to an inferior article being offered, he may discontinue at any time, and have the amount paid returned.

Note.—The publication of the first volume is deferred until the receipt of the Biography, Private Correspondence, and the New Edition of the Author's Poetical Works, with 'contemporary criticism—various readings—and correspondence with some of the most eminent persons of the time when the Poems first appeared,' now in the course of publication in England.

Volume 1 will be ornamented with an excellent Portrait of Sir Walter Scott.

DAILY PITTSBURGH GAZETTE.

TUESDAY AFTERNOON, OCT. 8, 1833.

THE ENTERPRIZE AND AMBITION OF NEW YORK.—We believe that no state or country, of the same population as New York, has ever displayed so much enterprize and ambition as that state has done, in the last eight or ten years.—Forty years ago she was but the third state in the union, in population—now she is far ahead of all the others. Not satisfied, however, with her present pre-eminence, her statesmen and politicians seem to aim at still farther advancement in wealth, in business, and in population. The Ohio canal is, as yet, a mere tributary to the great New York canal.—The Mad river rail road to be made, as was the Ohio Canal, by New York capital, is designed as another tributary, and the Wabash and Maumee canal is similar in its design and tendency. That great state is advancing boldly in her great scheme for monopolizing the whole trade of the West. Of the foreign commerce of the country her great city enjoys a very large proportion, and that proportion will be greatly increased, if Mr. Van Buren should succeed in his efforts against the Bank of the United States.

The location of that Bank in Philadelphia is of immense advantage to that city and Pennsylvania—destroy it, and Philadelphia, and this state, will at once lose much of their relative importance.—The designs against this institution will, therefore, we may safely calculate, be prosecuted with untiring zeal.

To compete, successfully, with N. York for the western trade, we must have a connection with the Ohio canal, and improve the Ohio river, from Pittsburgh to the mouth of the Scioto, so that steam boats may run at all times. This latter improvement would be almost as injurious to New York, as it would be useful to Pennylvania. We may, therefore, confidently calculate that the New Yorkers will throw every obstacle in the way of its completion.—During Mr. Adams' administration, an act was passed for the improvement of the Ohio and Mississippi, from Pittsburgh to N. Orleans.—Since that time, much work has been done between Louisville and New Orleans, but not a stroke of the mattock in our neighborhood. We would not venture to assert that New York influence has prevented this, but it would certainly be the obvious policy of that state to injure rather than improve the navigation of the Ohio from Pittsburgh to the south end of the Ohio canal at Portsmouth.

The question—Why has no work been done under the act of 1824, near Pittsburgh, has been often asked, but never answered.—We would not undertake to charge New Yorkers with an unfriendly influence in this matter, our only design is to show that these two states have interests directly adverse to each other, and to suggest to our fellow citizens the bad policy, and danger of advancing Martin Van Buren to the Presidency.

THE DREAMER, JOHNS.—Although we were well acquainted with the drowsy habits of our neighbor of the Democrat, yet we had no expectation that he would fall asleep, in broad day light, on the day before a General Election.—It seems, however, that we were mistaken—the editor of the Democrat must have been asleep, when he wrote the leading editorial article in his paper, of yesterday, from which the following passages are extracted:—

"The Gazette, of Saturday last, contains the proceedings of a "Young Men's Meeting," favorable to Mr. Irwin. A word or two will explain the whole matter. The mover of the resolutions and the prominent speech maker, was none other than the prominent *opposer* of the resolutions at the meeting of National Republican Young Men."

He must have been dreaming when these sentences were penned.—Our paper was issued and distributed on Saturday afternoon, some hours before the meeting took place; and, of course, no notice of the meeting was contained in it.

THE NATIONAL REPUBLICANS.—Almost two columns of the Allegheny Democrat, of yesterday, were occupied by articles, coaxing and flattering the National Republicans. In another column, there is a notice of the Inspector's election, in Philadelphia, headed "Democracy Triumphant," from which we make the following extracts:—

"It will be seen that the triumph of Democracy is complete. Last year, the National Republicans had a majority of 1,504 in the city—this year the Democrats have beaten them by a majority of 87 votes."

"In the 4th ward, the Independents elected their Inspector. In Moyamensing, the Democrats swept all before them. In Southwark, the opposition was routed, horse, foot, and dragoon."

Thus it is with these *new* friends of the Clay party; in one place, they endeavor to wheedle and coax that party, and, in another, triumph and exult at their defeat. In Pittsburgh, they endeavor to wheedle and coax them—in Philadelphia they calumniate and out vote them. In Pittsburgh they endeavor to exasperate the Clay men, by reminding them that the anti masons would not vote for their favorite, John Sergeant, one year ago; and at the same moment, their compatriots, in Philadelphia, are voting down that same favorite. Are the National Republicans really to be gulled and bamboozled in this way?

Something New for the Philadelphians.—The following receipt was handed to us, last night, with permission to use it.—What will our friends in Philadelphia think of it? Goods, for Pittsburgh, sent by the New York Canal, Lake Erie, and the Ohio Canal, to Massillon, and thence, by wagons, to this city, cheaper than they can be, as yet, sent from Philadelphia direct!!!

The following extract is from an editorial article in the last National Gazette, a National Republican paper:

"*The choice of members of the Pennsylvania legislature* and our municipal councils *is intimately connected with the national politics, and the main object of purging and reforming the Executive sphere at Washington. It will be for the government of Pennsylvania, by proper manifestation of opinion, to co-operate through her great authority in the Union*, and the voice and votes of her representatives in Congress, in overthrowing the spurious domination at Washington, and the theories which invest the mere will of the President with all power. It is for the city of Philadelphia to evince sentiments suitable to the duty of the legislature, and by the just influence of so large and enlightened a community to animate the whole commonwealth in proving herself to be "the Key Stone of the arch." The constitution and the Union are fearfully at stake."

It is undoubtedly true "that the choice of members of the Pennsylvania Legislature is intimately connected with the national politics." No honest, no intelligent man, will deny this. It has become the established custom of the legislatures of the different states, to express, whenever occasion requires, their opinions upon great national questions, and these expressions uniformly exercise a powerful influence upon the conduct, not only of the Senators, but even of the Representatives of the several states.—If Messrs. Robinson, Scott, and Kerr, should this day be elected, they will all give their votes and their influence against the Bank, and in favor of Martin Van Buren. Their election will be claimed as a Van Buren triumph, and the Nationals will have the credit or discredit of advancing the cause of one whose administration they profess to deprecate more than that of General Jackson. If they really feel and think as they *profess* to feel and think, they will, within three months, feel deep mortification for their conduct. The excuse, that the Anti Masons treated them badly, last fall, even if true, is but a poor, shallow one. It tacitly admits that their course is not consistent, but because the Anti Masons, as they allege, behaved badly last fall, they, in return, will behave badly now.

THE TOKEN AND ATLANTIC SOUVENIR, for 1834; Boston, Charles Bower.—This is the Queen of American Annuals. As now published, it is a union of the two splendid works named in its title, and combines, in the amalgum, the grace and spirit and sterling value of each. The TOKEN for 1834, a copy of which we have received from Messrs. Carey, Hart & Co.—is in very truth a splendid and beautiful work. Its intrinsic qualities, no less than the elegance of its outward form, constitute it a very appropriate friendship's offering.—The engravings are by the best masters, and some of them are exceedingly happy in design and execution. That of the Young Harlequin is a most interesting plate.—The artist has illustrated his subject with striking effect. The literary matter of this number is also highly creditable;—it being in this branch more particularly that the march of improvement, in this previously well established annual, is so evident.—The table of contents comprises a much longer list of articles, than we have heretofore noticed in any of our annuals. This, of course, admits of presenting greater variety—so as to furnish the means of gratifying every taste. The prose article entitled, "THE MODERN JOB," enforces, in elegant language, a useful lesson; while, in the poetical department, we have one by Ex-President Adams, entitled 'THE PLAGUE IN THE FOREST,'—the moral of which is striking, and the application as easy now as at any previous period. In a word, we consider the "TOKEN AND ATLANTIC SOUVENIR" as the ne plus of annuals; and we trust, the publisher will find, in the approbation which it will elicit, and in the extent of his sales, a full reward for his various investments in the enterprise.—*Balt. ANTHRACITE COAL.

The discovery of Anthracite Coal, in Berkley Co., Va., was made, a few weeks ago, by Mr. *Purcell*, Engineer, of this place. He brought to this town with him on his return a large quantity of the discovered mineral, for samples, some of which we have seen. The Coal seems to be of a superior quality, and the mine from which it was taken represented as one of the richest ever observed.—It is situated about sixteen miles from the Potomac river, near the line of Berkley and Morgan counties, and in the valley of a creek affording an excellent site for a rail road to convey its treasures to the Canal. The region in which this discovery has been made corresponds with the Anthracite region in Pennsylvania; and is on a line with Licking creek, in this county. It is said that no coal has been found south of that line or range of hills in that State, and the inference is that neither is it to be discovered south or east of it in this State or Virginia. Its discovery in one place in this neighborhood leads to the belief that it extends in strata from the coal mines in Pennsylvania throughout that State, Maryland, and Virginia, and even farther south. The day of enterprize and discovery is at hand, and as the Chesapeake and Ohio Canal penetrates the western hills, new and exhaustless mines of wealth will be brought to light, and rendered tributary to its revenue and the public prosperity, in a degree scarcely now to be estimated. These, without such an improvement, would have slumbered for ages yet in the bosom of the earth; or, if discovered, inaccessible by any means which could bring them to market and render them applicable to the various uses for which they are peculiarly designed.—*Williamsport (Md.) Banner.*

The Louisiana Advertiser, of the 18th ult., states that there have been quite a decrease in the number of deaths from yellow fever, within the last three or four days, but it is owing more to the want of subjects, than any abatement in the disease. We have ascertained that there has been a few new cases of cholera, but it does not appear to spread, and has been, in almost every case, produced by imprudence. The interments from the 8th of August to the 17th of September, were 972.

From St. Ubes.—Capt. Douhan, from St. Ubes, informs that the people seemed very well satisfied with Don Pedro, and that there was no interruption to business on account of the war between the two brothers.

Prolific.—Within the month of August, a young lady, of Schenectady, was delivered of five children at one birth!! The mother and children are all alive, healthy, and likely to live. A thousand dollars were raised in the city and given to the mother as a premium. The young lady has been since married to the father of the infants.

Lord Althorp, the British Chancellor of the Exchequer, in a debate on the assessed Taxes, lately expressed some opinions upon the obligation of Ministers to follow popular opinion, which are now in the British House of Commons—at least for a Cabinet Minister to utter. He said that "in *all* cases" a legislature should look to the "popularity or unpopularity of a particular tax;" and that, accordingly, though on "purely financial" principles, he approved of the taxes in question, he would try and find some more pleasing substitute.—*Baltimore Amer.*

An artificial magnet has recently been constructed by Professor Henry, of Princeton College, which far surpasses in power every thing of the kind. A number of interesting experiments on the subject of electro-magnetism, were exhibited by means of this wonderful instrument, in the presence of the students, and a large number of gentlemen assembled to attend the late commencement. Upon one trial of its strength, it was found to be capable of raising between three and four thousand pounds; and we learn that with some farther modifications of the apparatus, the magnet will probably be able to sustain upwards of four thousand pounds.—*Nat. Gaz.*

An Appropriate Figure.—In a late number of Major Noah's Evening Star, we find the following correct reflections:

"Those who count so strongly at the ballot box, the operatives, the mechanics, the artisans, and the laborers, have little time to investigate questions of this kind; it was sufficient they were told, the United States Bank was a dangerous institution; they started upon the hunt, and have pursued and will pursue it until at some breathing place in the chase they stop to rest, and recount the perils of the day, and the value and importance of the victory, then they may find that they have pursued the noble lion who kept in check the tigers and panthers of the forest, and danger and ferocity of animals whose power, separately, may be less, but whose attacks will prove far more fatal and destructive."

Waterfall of 892 Feet.—The Falls of Girsupar, in North Canara, on the western coast of the Madras territories, are of unparalleled depth, being no less than 892 feet. They are, as far as history or travels have informed us, the highest falls in the known world. The falls of Niagara, in the state of New York, are 160 feet.

Consistency.—In the celebrated Veto, Gen Jackson was made by his principals to inveigh strongly against the Bank of the United States, because of the foreigners who have become interested in its stock. The removal of the deposits in part to the Manhattan Bank, says the New York Commercial Advertiser, furnish a striking commentary upon the sincerity of this objection. The stock of the Bank is almost entirely owned by foreigners, and exclusively mannaged by them. *It is moreover the only Bank in the United States, in which foreigners have a right to vote upon their stock!—Poulson.*

There are several different versions given of the discovery of the conspiracy against the life of the Emperor of Russia. One of them, which is, by no means the most probable, is that several Polish refugees, disguised as journeymen watchmakers from Geneva, contrived, by means of false passports, to advance directly to Petersburgh, where they were received as foreigners who had acquired a knowledge of the technical terms used in that country. One of them having had the imprudence, in a moment of forgetfulness, to discover his knowledge of the Russian language; this circumstance raised suspicion, which caused inquiries to be made that led to the discovery of the conspiracy.

The ship Robert Wilson, owned in New York, and chartered by a house in that city, for a voyage to Vera Cruz, has been seized by the authorities of the latter place, for having carried out several boxes of spurious coin, to be put in circulation in Mexico. The boxes had been landed, with the exception of one, and placed upon a cart. It seems, however, that the last box was too heavy for the man who attempted to raise it on the cart, and he let it fall on the walk, when it burst open in the presence of the Custom House Officer, and the money was scattered about the street. The officers immediately arrested the consignee, a clerk in a respectable mercantile house in Vera Cruz, and a person concerned in taking the money out. Letters from Vera Cruz give the names of the individuals implicated in sending this coin to Mexico: they also state that the authorities of Vera Cruz have information that another vessel, now on her way, has a large quantity of spurious coin on board.

THE SHAH OF PERSIA'S PLATE.—The Shah of Persia possesses the most magnificent collection of plate in the world. It consists of upwards of 4,000 utensils of gold, most of which are set with precious stones or pearls. Among them are sets of spoons, vases, cups, jugs, basins, dishes, &c.; some of the cups are so heavy that when filled they cannot be lifted with one hand. Perhaps the most remarkable portion of the collection is a set of spoons, each a foot long. The bowls of these spoons are of wrought gold and the handles are richly set with rubies, and terminated by large diamonds. The immense size of these spoons is occasioned by the Oriental custom of eating, seated on the ground.

Foreigners are permitted to see this splendid and unique collection of plate, and also the crystal bedstead, lately presented by the Emperor of Russia to the Shah of Persia.

A Paris paper gives the following account of the terrific effects of lightning. A party of eight men who were playing at nine pins, took shelter under a lime tree, but in a few minutes the lightning ran down the tree, and struck six of them; two were killed on the spot, and three were very seriously injured, the sixth was knocked down but not hurt, and the other two were not at all affected by the shock. The hat of one of the victims was torn into more than 60 pieces, and a part of it was found amongst the branches of the tree, not a leaf of which was damaged, but a strip of the bark was peeled off from the top to the bottom of the trunk.—*Poulson.*

Literal Translation of a Chinese Ink Maker's Shop Bill—"At the Shop *Shun-wang*—very good Ink—fine, fine,—Ancient shop—grandfather, father and self make this ink,—fine and hard, very hard,—picked out, very fine and black, before now,—sell very good Ink, prime cost very high. This ink is very heavy,—so is gold. No one makes like it. Others who make ink, make it for money, and to cheat; I only make it for a name. Plenty of gentlemen know my ink. My family never cheats, always bears a good name. I make ink for the 'Son of Heaven,' and all the mandarins round. All A kwantsze's (gentlemen) must come to my shop and know my name!"

China.—Shoemakers form the most numerous class of operatives in Canton; the number is estimated at about 25,000. Of lapidaries, there are upwards of 7,000. Of weavers, there are about 15,000. The carpenters and cabinet makers are estimated at 16,000. There are above 18,000 boats of different sizes trading, which pass along the river from Canton to Whampoa; the tanka, or small boats, in which people live, are said to be upwards of 50,000.

The Whale at Charing Cross.—The skeleton of the whale, which is now on exhibition in the booth opposite the King's Mews, has become a great source of attraction, and is well worthy inspection. The belly of the whale is fitted up with a table and chairs, containing an album, some books of natural history, and other incidental incitements to curiosity. The following are the precise dimensions of the whale: total length of the animal, 95 French feet; length of the head, 22; length of the tongue, 20; height of the cranium, 4 1-2; length of the vetebral column, 69 1-2; number of the vertebræ, 62; length of the ribs, 9; number of do., 28; length of the fins, 12 1-2; length of the fingers, 4 1-2; width of the tail, 22 1-2; length of do., 3; weight of the animal, 480,000 lbs.; weight of the oil, 40,000 lbs.; weight of the rotten flesh buried in the sand, 170,000 lbs. The upper jaw is fitted up with 800 fanons, or whale bones. From the calculation made by Monsieur le Baron Cuvier and the Professors of the King's Garden, this enormous animal must have lived nine or ten centuries. The whale was found floating in the North Sea, between Belgium and England, November 3d, 1827, by a crew of fishermen.

According to the New York Evening Star, of yesterday, Judge Wayne, of Georgia, has been selected as the candidate of the Van Buren party, or the Regency, for the Speaker's chair in the House of Representatives. The editor of the Star thinks that Judge Sutherland will be baffled, if he should be elected to Congress. Surely, as the antagonist of Mr. Sergeant, the Judge will not have the suffrages of the National Republicans in the House.—*Nat. Gaz., Oct. 4.*

With regard to the Cholera, the London Medical Gazette, says—

"Probably, last season, before the characteristic symptoms and physiognomy of the disease were sufficiently well known, many cases were called cholera, to which that name would not now be applied. Government have appointed inspectors to report upon the subject, and the result of their investigation may be regarded as, upon the whole, of a consolatory nature. While on the subject of the disease, we should state that the speedy use of tepid water, in cases of sudden bowel attacks is strongly recommended—half a pint to be taken every two minutes during pain, and to be still continued even should vomiting ensue. A physician, at Gloucester, last year, cured 18 out of 20 cholera cases in this manner."

Welland Canal.—The Welland canal is a Sloop and Steamboat passage, on the Canadian side, around the Falls of Niagara, between Lake Erie and Lake Ontario.—It was commenced on the 30th of November, 1824, and finished in the autumn of 1829. Two vessels, one British and the other American passed the great locks, Nov. 30, 1829, just five years from the commencement of the work. One of the vessels carried 85 tons and passed the 32 Locks in 5 1-2 hours. The whole distance between the two Lakes is 38 miles, and is passed by vessels carrying 150 tons in 24 hours. The canal is 10 feet in depth and 70 in width, with a lockage of 360 feet by 32 locks, averaging nearly 12 feet to a lock. A Cleveland paper states that, 22 vessels arrived at that port in one week, in July last, by the way of this canal from Lake Ontario.—*Har. Intel.*

The proprietors of a stage coach, on one of the roads in Ireland, having in order to signify their readiness for action and their determination to put down all opposition, caused the well known motto "*Paratui ad arma*" to be painted in large letters on the pannels of the coach; the inscription was thus spelled over, and construed by an Irishman whose eye it happened to catch: "P-a-r-a-t-u-s—Praities;—Praities at Armah, is it? Sure, where's the use of telling us that? Isn't there Praities every where?"

The coal mines, which in Staffordshire have been burning for 200 years, consist of pyrites, subject to spontaneous combustion. Water will not extinguish them, because when drawn off, or absorbed, the pyrites burn more than before.

Shakspeare, Butler, and Bacon, have rendered it extremely difficult for all who come after them to be sublime, witty, or profound.

Pleasure is to woman what the sun is to the flower; if moderately enjoyed, it beautifies, it refreshes, and it improves; if immoderately, it withers, dissolves, and destroys.—But the duties of domestic life exercised as they must be in retirement, and calling forth all the sensibilities of the female, are perhaps as necessary to the development of her charms, as the shade and the shower are to the rose, confirming its beauty and increasing its fragrance.

The most rational, and therefore truest remark that has been made with respect to the great question—which is the better, the married or the single state? is the following:—Whichever resolution you come to, repentance will follow.

Conscience.—Mr. Hervey, uncle to the first Earl of Bristol, was much in favor with King Charles II. and yet upon a great occasion he voted against that which the king desired; so the king chid him severely for it. Next day, another important question falling in, he voted as the king would have him. So the king took notice of it at night, and said, "You were not against me to day." "No, sir," he replied, "I was against my conscience to day."—*Sharpe's Peerage.*

We have seldom, if ever, met with a stronger instance of political instability, than is displayed in the recent operations of Dr. Joel B. Sutherland, of Philadelphia, who procured the passage of a law, by the late Pennsylvania Legislature, creating an Office of Judge in the City of Philadelphia, to which he was himself appointed. After the adjournment of Congress, he entered upon his duties as Judge. About three weeks since he resigned his seat in Congress, and a new election was ordained. On Friday last Judge Sutherland was nominated to fill the vacancy which his own resignation had created! And he has accepted the nomination!! It remains to be seen whether the Electors of his District are as capricious as their Representative.—*Alb. Ev. Jour.*

Elephants are now used in Ceylon for ploughing the rice fields, and in preparing new grounds for the cultivation of coffee, paper, &c. An elephant will perform the work in one day which twenty bullocks were in the habit of performing before. In a country like Ceylon, which is so very thinly populated, by this system of employing elephants much time is saved, and a great deal of agricultural work performed; an elephant may be purchased in Ceylon at any time for 10 or £15.

Chance has led to the discovery of a method of preserving potatoes, which is both simple and attended with little or no expense. A housekeeper had placed in his cellar a quantity of charcoal.—Having removed it in autumn, without sweeping the dust which covered the ground, he caused a large quantity of potatoes to be laid on it. Towards the spring, those roots were preserved, and had thrown out no shoots, and were as fresh and well flavored as ever.

We take pleasure in recommending to our former customers, Messrs. M'Lain, King & M'Cord, our successors, who, we believe, from their knowledge in the business, will afford satisfactitionto all who may favor them with their custom.

JOHN M'KEE,
JOHN GRAHAM,

PIANO FORTES.

MR. TAYLOR respectfully announces to the citizens of Pittsburgh, that he has just received an assortment of PIANO FORTES, from the celebrated manufactory of Robert Nunns, Clark, and Co. (late R. & W. Nunns,) of New York, which he offers to the public at a fair price, and liberal terms.

The instruments of this most extensive establishment have (for quality and volume of tone, and for materials and workmanship) received the decided approbation of the most distinguished professors of this country and Europe. The manufacturers therefore feel confident in resting their claims to public patronage upon the intrinsic merits of the Piano Fortes themselves.

FLUTES.

Also, a few of 'Taylor's approved' Flutes; these instruments are well worth the attention of the Amateures of the Flute.

☞Ladies and Gentlemen are invited to call and examine the above instruments, at Cook and Schoyer's (late Sylvester's) store, corner of Wood and Third streets, where they will remain but a short time, Mr. Taylor's stay in this place being limited. Oct. 7, 1833.

Public Sale of Real Estate.

IN pursuance of an order of the Orphan's Court, of the county of Allegheny, will be exposed to Public Sale, at the Court House, in the city of Pittsburgh, on Monday, the 21st day of October next, at 11 o'clock, A. M., the following described Real Estate, late the property of Oliver Ormsby, deceased, viz:—

1st. All that certain piece of land, situate in St. Clair township, on the Brownsville road, between 3 and 4 miles from the city of Pittsburgh, now occupied by Mrs. Nelson. This tract contains 49 acres, and 144 perches. There are upon it about 35 acres of cleared land; a substantial hewed log house, two stories high, and a fine bank of coal. It is bounded by land late of Henry Baldwin and others, and is part of a tract formerly owned by Fulton, and which was divided among the said Oliver Ormsby, Henry Baldwin, and William Wilkins.

2d. All that certain tract of land, situate on the south side of the Monongahela river, in Mifflin township, now occupied by Fergus Dempsey and George Ramsey. This tract contains, by the patent, 209¾ acres, and is bounded by land of Johnston Glass, Daniel Reisher, heirs of Robert Hays, Joseph West, and others, and by the river. There are about 150 acres of bottom land on this tract: the well known Ferry, called 'The Six Mile Ferry,' is also upon it. Nearly all the bottom land is cleared. The buildings are as follows, viz: —a log tavern house and barn at the Ferry, and a large frame barn, and a frame dwelling house upon the part occupied by George Ramsey. If desired by purchasers, the tract would be sold in two parts, to be divided by the run.

☞ The titles to these tracts are indisputable.—Any information, respecting the land, or the titles, can be obtained from the subscribers. Terms at sale.

PERIODICALS.

AMERICAN RAILROAD JOURNAL, and Advocate of Internal Improvements, which is designed as a repository of the accounts of the rise and progress of numerous works of Internal Improvement, in the United States particularly, and in other parts of the world generally. The work is published weekly, and forms a large octavo volume each year, of 832 pages of 3 columns each, for $3 per annum, in advance.

New York Farmer, and American Gardener's Magazine. This work is designed for the agriculturist, and will be found to contain much, both interesting and profitable, to those who cultivate the soil as a business, or merely a garden for amusement. Published in monthly parts of 32 large octavo pages, with three columns each, at $3 per annum, in advance.

Mechanics' Magazine, and Register of Improvements and Inventions. To the Mechanics of the United States--In this populous and enlightened country, almost every description of persons can obtain knowledge and amusement connected with their peculiar pursuits, through the medium of the Journal or Magazine, especially devoted to their interests. The Theologian, the Farmer, the Philosopher, the Sportsman, and even the Plough Boy, has each his Journal, where he can find a record of the passing events of the day, connected with his peculiar avocations and recreations. Hitherto, the Mechanics (who form a large and most important portion of the community) have had no Journal, to which they could turn, with the certainty of finding that information they desire, no periodical of which they could say: 'This is ours, and for us.' In the hope that the attempt to supply such a want at a price so reasonable as to be within the reach of all, will meet with your active support, the subscriber proposes to publish, on the first day of each month, a Mechanics' Magazine. It will contain a well digested selection of the most useful and interesting articles in the London Mechanics' Magazine, London Register of Arts and Sciences, Repertory of Inventions, Library of Useful Knowledge, Journal of the Franklin Institute, and other works, connected with the arts and manufactures, published in this country and in Europe, accompanied with numerous and well executed Engravings. Its pages will be open for the communications of all, and especially for those of the practical artisan, to whose interest it will be particularly devoted. The Mechanics' Magazine will contain, also, a due portion of the occurrences of the month, Scientific and Literary Reviews of Books, Anecdotes, Economical Receipts, Reports of the state of Mechanics' Institutions, and other Scientific Societies in this state and other countries. To be published monthly. Each succeeding number will contain 64 pages, handsomely printed, and stitched in a neat cover. Six numbers will form a volume, for which an index and title page will be supplied, and also a Portrait of some distinguished Mechanic, as a Frontispiece. Terms, $3 per annum, in advance.

DOCTOR ROBERT'S
☞ *WELCH MEDICAMENTUM.*☜

FOR the cure of Dyspepsia, Liver Complaints, Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,
From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.
Utica, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer is vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

GEO. W. CARPENTER'S
COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes givingt emporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradully increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention, state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.

VALUABLE PROPERTY
FOR SALE.

THE Subscriber offers for sale the farm on which he lives, in Washington county, on Pigeon creek, one mile south of Williamsport, on the Monongahela river, to which there is a perfectly level road. This farm contains near 400 acres, the greater part of which is first rate land. There is on the premises a Brick Dwelling House, a Merchant mill, in good repair, a new saw mill, a stone still house, 35 by 40 feet; a salt works is also in operation, and worked to advantage; about 150 acres of land cleared and under good fence. There is on the premises three small tenements for the accommodation of families. This tract is well timbered, and abounds with stone coal and springs of water, both of the best quality.

To a person wishing to embark in a manufacturing business, and possessing capital, this would be a very desirable situation, having the advantage of both water power from Pigeon creek, and banks of the very best coal near to the works, and easy of access, and its vicinity to so navigable a river where articles of any kind are so cheaply transported to Pittsburgh.

For further particulars, apply to James P. Stuart, Merchant, Wood street, Pittsburgh, or to the subscriber on the premises.

To Baltimore and Philadelphia
TRAVELLERS.

THE LINE OF STAGES between Chambersburgh and Baltimore, on the Somerset and Mountpleasant route, has been doubled, and now runs DAILY, (Mondays excepted,) leaving Chambersburgh *at day-light* in the morning, and arriving in Baltimore, early the same evening.

Passengers reach Philadelphia, in this way, the second afternoon, from Chambersburgh, without the loss of any rest; taking the splendid STEAM BOAT LINES, which set out at 6 o'clock in the morning, [via CHESAPEAKE AND DELAWARE CANAL, a work well worth the trip to see.]
REESIDE, Owner.

In all cases where the passengers desire to reach Baltimore in time for the 5 o'clock steam-boat to Philadelphia, they can do so by leaving Chambersburgh at one o'clock in the morning, or immediately after the arrival of the Western Mail Stage. In this way, they arrive in Philadelphia, by eight o'clock the *second morning*, from Chambersburgh.

☞ When a load offers, the stage will run on Mondays. April 23, 1830.—tf.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.
